DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 15 and 16, drawn to a method and communication network that provides information related to another communication service subscribed to by a called subscriber with respect to a calling subscriber, classified in class 379, subclass 201.05.
 - II. Claims 3 and 17, drawn to a method and communication network includes displaying an acquired communication identification information on a display unit, classified in class 379, subclass 142.01.
 - III. Claims 4-14 and 18-20, drawn to a method and communication network includes storing and notifying both communication services of a subscriber and identification information capable of selectively utilizing the communication services so as to establish a communication, classified in class 379, subclass 207.02.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

Art Unit: 2642

case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I provides information related to another communication service of a called subscriber to a calling subscriber does not require to display the information as claimed in invention II. The subcombination has separate utility such as storing and notifying communication services.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benny Q. Tieu whose telephone number is (703) 305-2360. The examiner can normally be reached on Monday-Friday: 6:30AM - 5:00PM.
